

In Google's public demo dataset, revenue rose 60.7% to 38086, driven largely by the United States.

Summary

- Revenue was 38086, up 60.7% from 23694; transactions were 563, up 53.8% from 366.
- Sessions rose 15.1% to 25914, but conversion rate fell to 1.44 from 1.52.
- United States revenue was 17492, up 86.5%, with a gap_vs_total_pts of 25.7.
- Source attribution is partially obfuscated; channel-level conclusions need caution.

This week in numbers

Metric	This week	Previous	Change
Revenue	\$38,086	\$23,694	+60.7%
Transactions	563	366	+53.8%
Sessions	25,914	22,508	+15.1%
Conversion rate	1.44%	1.52%	-4.7%
Average order value	\$67.65	\$64.74	+4.5%
Revenue per session	\$1.47	\$1.05	+39.6%
Engagement rate	83.91%	83.59%	+0.4%

Weekly revenue across the replay. This week in navy.

What changed

Positive Total revenue and transactions rose sharply. Revenue was 38086, up 60.7% from 23694; transactions were 563, up 53.8% from 366.

Warning Conversion rate declined. Conversion rate was 1.44, down 4.7% from 1.52, while sessions rose 15.1% to 25914.

Positive

United States outperformed total. US revenue was 17492, up 86.5% from 9381, with gap_vs_total_pts of 25.7.

Likely drivers

- The total revenue lift is likely concentrated in the United States, which had revenue of 17492, up 86.5%, and a gap_vs_total_pts of 25.7.
- Higher revenue per session, 1.47 versus 1.05, is consistent with more value per visit rather than only more sessions.
- Mobile transactions grew 75.5% to 258, which may have contributed to the total transaction increase.

Risks if nobody acts

- If the conversion-rate decline continues, future session growth may not translate into revenue.
- If the US lift is not verified, channel decisions may rely on partially obfuscated source data.
- High-interest products with zero purchases, such as Google Blue Stoj Cup with 1467 views and 0 purchase lines, may indicate a checkout or product-page issue.

Actions

Priority	Action	Owner
High	Audit the checkout flow for mobile and desktop to identify why conversion rate fell to 1.44 from 1.52. Sessions grew 15.1% but conversion rate declined 4.7%, suggesting a friction point in the purchase path. Evidence: conversion_rate current 1.44, previous 1.52, change_pct -4.7; sessions current 25914, previous 22508, change_pct 15.1	E-commerce & CRO
Medium	Investigate the United States revenue spike to confirm whether it is a demand story or a tracking artifact. US revenue grew 86.5% versus 60.7% total, with gap_vs_total_pts of 25.7, which is a large divergence. Evidence: United States revenue current 17492, previous 9381, change_pct 86.5, gap_vs_total_pts 25.7	Analytics & tracking
Medium	Review product pages and pricing for Google Blue Stoj Cup, which has high views but zero purchases. The product has 1467 views and 99 adds to cart but 0 purchase lines, indicating a drop-off at the purchase step. Evidence: Google Blue Stoj Cup views_cur 1467, adds_to_cart_cur 99, purchase_lines_cur 0, view_to_purchase_pct 0	Merchandising

Data caveats

- This is Google's public obfuscated GA4 sample dataset, not a real client.

- 24.4% of session-level source rows are unknown or obfuscated; treat channel breakdowns with caution.
- Calendar events are empty for both weeks, so no seasonality explanation is available from the payload.
- Session-level source is available for 73.5% of sessions; the rest use the user's first-touch source.
- Treat source breakdowns with caution: 24.4% of sessions rows are unknown or obfuscated.

How this brief was made

Every number was calculated in SQL and Python from GA4 event data. The written analysis was produced by qwen/qwen3.8-27b:free and checked by the number validator: 59 numbers checked, none invented, passed on attempt 2. Source: bigquery-public-data.ga4_obfuscated_sample_ecommerce. Public obfuscated GA4 sample (Google Merchandise Store). Architecture demonstration.
