

Revenue rose 26% to 47973 in the Thanksgiving/Black Friday week, but the add-to-cart to checkout step fell to 102.82 from 196.99.

Summary

- Total revenue was 47973, up 26% from 38086, with transactions at 681, up 21% from 563.
- Sessions were 27780, up 7.2%, and users were 22126, up 10.8%, consistent with the US Thanksgiving and Black Friday calendar.
- Conversion rate was 1.85, up 28.5% from 1.44, and AOV was 70.44, up 4.1% from 67.65.
- The biggest funnel leak was Add to cart -> checkout, which moved to 102.82 from 196.99, a -47.8% change.

This week in numbers

Metric	This week	Previous	Change
Revenue	\$47,973	\$38,086	+26.0%
Transactions	681	563	+21.0%
Sessions	27,780	25,914	+7.2%
Conversion rate	1.85%	1.44%	+28.5%
Average order value	\$70.44	\$67.65	+4.1%
Revenue per session	\$1.73	\$1.47	+17.5%
Engagement rate	85.33%	83.91%	+1.7%

Weekly revenue across the replay. This week in navy.

What changed

Positive Total revenue and transactions increased. Revenue was 47973 vs 38086, +26%; transactions were 681 vs 563, +21%; sessions were 27780 vs 25914, +7.2%.

Critical Add to cart » checkout declined. Add to cart -> checkout was 102.82 vs 196.99, -47.8%, and is the biggest leak.

Positive Referral channel converted strongly. shop.googlemerchandisestore.com / referral revenue was 13458, +29.4%, with conversion rate 2.97, +62.7%, while sessions were 4949, +0.4%.

Watch Mobile view-to-cart moved below total. Mobile product view to cart rate was 18.64 vs 8.42, +121.5%, with gap_vs_total_pts -16.8; total view-to-cart is flagged for tracking verification.

Likely drivers

- The week included US Thanksgiving and Black Friday, likely driving higher sessions, users, and revenue.
- New users were 19299, up 12.9% from 17100, consistent with holiday shopping traffic.
- The add-to-cart to checkout decline is not explained by the calendar events in the payload and likely needs a checkout or tracking investigation.

Risks if nobody acts

- If the add-to-cart to checkout step remains at 102.82 vs 196.99, checkout completions may continue to be lost.
- If the product view to cart rate is not verified, teams may act on a tracking artifact instead of a demand change.
- If new purchasers are not followed up, returning revenue share may remain low at 2.21 vs 3.28.

Actions

Priority	Action	Owner
High	Verify the product view to cart tracking before using it in planning. The total product view to cart rate is flagged as check_tracking true and is not a demand story. Evidence: Product view to cart rate current 19.11, previous 8.02, change_pct 138.4, check_tracking true.	Analytics & tracking
High	Review the add-to-cart to checkout step in the checkout flow and confirm whether the 102.82 vs 196.99 change is a tracking or conversion issue. This step is the biggest leak and a critical risk. Evidence: Add to cart -> checkout current 102.82, previous 196.99, change_pct -47.8, biggest_leak.	E-commerce & CRO

Medium	Create a post-purchase follow-up flow for new purchasers to encourage a second order. New purchasers and new-purchaser revenue rose sharply, while returning revenue share fell. Evidence: New purchasers current 484, previous 352, change_pct 37.5; revenue_from_new current 46840, previous 36903, change_pct 26.9; returning_revenue_share_pct current 2.21, previous 3.28.	CRM & retention

Data caveats

- Product view to cart rate for All traffic (current 19.11, previous 8.02, change_pct 138.4) has check_tracking true and must be verified before acting.
- Session-level source is available for 73.5% of sessions; source breakdowns should be treated with caution because 24.4% of sessions rows are unknown or obfuscated.
- <Other>, (data deleted), and (not set) are obfuscated placeholders and should not be used for actions.
- This is Google's public obfuscated GA4 sample, not a real client.
- Session-level source is available for 73.5% of sessions; the rest use the user's first-touch source.

How this brief was made

Every number was calculated in SQL and Python from GA4 event data. The written analysis was produced by qwen/qwen3.8-27b:free and checked by the number validator: 73 numbers checked, none invented, passed on attempt 2. Source: bigquery-public-data.ga4_obfuscated_sample_ecommerce. Public obfuscated GA4 sample (Google Merchandise Store). Architecture demonstration.
